Century College Manufacturing Training

Century College develops and delivers innovative, hands-on training solutions for manufacturing in order to bridge the skilled worker gap and prepare employees for industry certification. Our customized programs are portable, flexible and brought to your work site when you need it. We focus on addressing the needs of incumbent workers and underserved populations creating connections and partnerships between employers, individuals and the communities they serve.

**Portable
& Flexible**

PORTABLE & FLEXIBLE hands-on training delivered to your work site, at times that are best for you.

CUSTOMIZED SOLUTIONS to address new technologies and workforce needs.

BUILDING CONNECTIONS between employers and community-based organizations.

Customized Training

One Size Doesn't Fit All.

We will work with you to understand your specific challenges, needs and priorities and can build a training program that meets and exceeds your expectations.

Our Instructors

- Industry-recognized credentials
- Relevant field experience

We Bring the Training to You!

You don't need to send your employees to us....we'll bring short-term training directly to your workplace. And we'll do it when it's convenient for you and your schedule.

- Quality inspector
- Lean
- NFPA 70 E
- Boilers
- NEC
- HVAC

"Demand for individuals with skills in the areas of medical assembly, machine operation, inventory control, welding, soldering, and other skilled trades is very high. Manufacturing-based training is crucial to the labor supply in the Twin Cities."

Andrea Pendleton, Volt Workforce Solutions

"People want to know the work they do makes a difference—manufacturing produces things that make a difference locally and globally; it adds value."

Traci Tapani, Wyoming Machine, Inc.

"Maintaining the equipment in today's automated manufacturing environment requires employees with a diverse and ever evolving set of skills and knowledge. International Paper has depended on Century College to provide vital training/education in several technical areas for our skilled employees."

Scott Smith, International Paper
