A decision to offer semester 6, 7, and 8 courses at alternating colleges fall and spring semesters was approved by the MANE Steering Committee starting fall, 2018. At six of the seven community college campuses a new semester six cohort (NURS 406) will start every other semester on a rotating basis. Students will still be able to complete the entire curriculum at their home campus in more of a flexible, part-time manner or they can choose to move through more quickly by attending classes at other college campuses. Courses are held at Ridgewater College every semester except when offerings for a semester are 100% online to accommodate the out-state students. Summer course options are also available to provide additional flexibility and lessen the load for students during the regular academic year. We are hoping that offering more options and better planning will reduce the need to cancel low-enrolled sections, and boost the numbers of students choosing to continue in the last three semesters of the program.

The dean or director of your Nursing program is a member of the MANE Steering Committee. Questions and concerns should be directed to them.

Students can register in their original cohort location or other locations listed above for the NURS 406-459-490 sequence.

* If not originally in the Ridgewater cohort permission is required to register in the Ridgewater sections.
